

Reflection on Assignment 3

I absolutely liked the industrial trip to UTMDigital. Even though it's just close to us, we never really know what's inside and it amazed me. The working spaces are nice, the small kitchen is making me feel cozy for no reasons, and the interactive board is really fun. The concept of disaster recovery centre is quite new to me and after hearing the explanations it fascinates me. The server room is like a place that looks like it shouldn't exist in our university, but yes it's there and I love it.
