

Reflection on Assignment 2

This industrial talk has given me a bunch of information on the rough overview of ICT jobs in this era. They had motivated me to learn more and deeper about all the knowledges I had now, so that I will get the position I aim for in the future for my career. By combining all the experiences I have heard from my family members, I strive to be a more flexible person during job to avoid getting into some troubles and make my work more efficient. I had to thank the crew that gave us such meaningful talk as it helped me to start developing a lifestyle that can suit myself into working in the future.
