Reflection on Assignment 4

This industrial talk had talked a lot about Telekom Malaysia, which is the national telecommunications company for our country. Of course, it told us a lot about the insights for the career which is related mostly to Data Computing or Analytics. They had mentioned about the technologies that are used mainly during their work, also the tools that helped their process to be more efficient. I hope that after listening to this, I get to learn and improve myself to be a better programmer in the future.
